Part of the ECA Group robotic portfolio was present at Satory, and precisely the UGV Cobra MK2, the Cameleon and the latest generation Iguana. In December 2017 the latter has won the SMINEX contract with the French DGA, together with CEFA and Scopex, for a complete EOD and C-IED clearing solution, the overall contract value being of over 30 million Euros. A 45 kg robot with a 40 kg payload, it can be fitted with a 6-axes or 8-axes robotic arm. Electrically powered, with 2.5 hours endurance, it reaches 6 km/h and can lift up to 20 kg.
