

By upgrading the mine warfare equipment on existing vessels, ECA Group brings state-of-the-art capabilities at a cost-effective price to navies while enabling them to extend the life of their fleet already in service.

This toolbox can be installed on any conventional mine countermeasures vessels or on non-dedicated ships. ECA Group offers this modernisation solution to all navies that intend to keep and optimise their conventional mine countermeasure vessels or consider the acquisition of pre-owned vessels.

#### About iXblue

iXblue is a global high-tech company specializing in the design and manufacturing of advanced marine, photonics and autonomy technologies. The group in-house expertise includes innovative systems and solutions devoted to inertial navigation, subsea positioning, underwater imaging, as well as shipbuilding and test & simulation. iXblue technologies support Civil and Defense customers in carrying out their sea, land and space operations with maximum safety, efficiency and reliability. Employing a workforce of 750 people worldwide, iXblue conducts its business in over 60 countries. <https://www.ixblue.com/>
